Leela Shankar

Alumni Connections, a Human-Centered Design Case Study

Our empathy map on the Hive foam board.

What we found

Being in the same room is not connection.

What seven alumni, 100 ideas, and two prototypes taught our team about designing for students and alumni at The Claremont Colleges.

My role: interviews, ideation, prototype, testing, video | Sept 25 to Oct 23, 2026 | Team of 4

3 project partners

About the class and where this project sits

Design Project 2 of 3, Human-Centered Design (ENGR 180), Harvey Mudd College, Fall 2026. Course in progress.

The class. A project-based course in human-centered design open to all five Claremont Colleges, taught at the Hive by Fred Leichter (Engineering, Harvey Mudd) and Dr. Shannon Randolph (Environmental Analysis, Pomona). Each design project runs the same five steps: empathy interviews and observation, reframing, ideation, prototyping, and iteration.

Where this sits. DP1 was individual (Sept 11 to 24). DP2, this project, was a team of four (Sept 25 to Oct 22). DP3 is a team project running Oct 23 to December 2026.

The brief. "Design for meaningful alumni connections at The Claremont Colleges." The Claremont Colleges, called the 5Cs on campus, are five undergraduate colleges on one shared campus: Pomona, Pitzer, Scripps, Claremont McKenna, and Harvey Mudd. Partners: 5C Alumni Boards, Pomona College Alumni & Family Engagement Office, and the Associated Students of Pomona College.

Status. This page shows DP2 as completed and graded. DP3 is in progress through December 2026, for The Salvation Army: how service animals could help people dealing with addiction and homelessness. This page will be updated when it is complete.

Team of 4. Where this page says "I," it is my work. Where it says "we," it is the team's.

Problem Alumni engagement surveys from 2022 to 2024 put meaningful alumni engagement at about 19 to 20 percent (cited via US News in the project brief). Students feel distant from alumni, and existing platforms feel transactional.	**My role** I took part in every stage with my team. I brainstormed about 30 of our 100 ideas, conducted 2 of 7 interviews, helped create the 5C Family Network prototype, gathered feedback on it from 4 people, helped build the revised flyer, and edited our video.
What we made Two prototypes: the 5C Alumni Family Network (a program, tested with a flyer) and a Color War-style tournament for students and alumni.	**Biggest lesson** Putting students and alumni in the same space does not create connection by itself. The connection has to be set up with structure, clear roles, and a way for everyone to contribute.

The brief

Alumni who want to help, students who do not know how to ask.

The Claremont Colleges (the 5Cs) are five undergraduate colleges on a shared campus in Claremont, California. The brief described alumni who are excited to help but do not know where to start, and students who feel distant from alumni because existing connection platforms do not feel human. Asking for career advice can feel transactional, especially when students worry about asking for help at all.

Two scoping decisions came first. We chose to connect students with alumni, not alumni with other alumni. And we chose to avoid the career-focused style that platforms like Sagehen Connect often offer.

Evidence
Brief cites 2022 to 2024 engagement surveys: about 19 to 20 percent of alumni engage meaningfully.

Decision
Students with alumni, not alumni with alumni. Non-career by design.

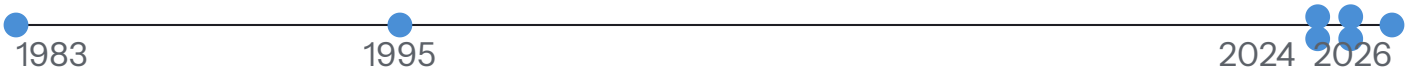

My part
Part of the four-person scoping conversation in week one.

If shipped
Any solution has to work for the 80 percent who go silent, not the 20 percent already engaged.

Empathize

Seven alumni, forty-three years apart.

As a team we interviewed 7 alumni, from the Class of 1983 to the Class of 2026. Some live in Claremont. Others live in Bali and Berlin. I conducted 2 of the interviews. We also had 2 other conversations about how Pomona currently handles student and alumni relations. Interviewees are identified by college and class year only.

Pomona '83 Bali

- Retired. Family history of attending Pomona.
- Spoke to students at alumni weekend and loved it.
- Conscious that "my perspective may be dated."
- Misses live music at the Smudge Pot.

Pomona '95 Location not stated

- Fond memories of traditions that no longer exist, like Screw Your Roommate.
- Excited by the idea of reviving lost traditions.

Pomona '24 Location not stated

- Tennis team network supported her transition out of college.
- Wants to "pay it forward."
- First interactions should feel casual and human, not transactional.

Scripps '24 Berlin

- Friendships formed in college keep her connected.
- Two Scripps alumni she did not know well picked her up from the airport when she moved. A close friendship followed.

Pomona '25 Claremont

- Works at Pomona now; close in age to students.
- "Strong feeling of support" from the alumni network.
- The biggest thing people miss is the people.

Pitzer '25 Claremont

- Research technician nearby; easy to come back for now.
- Enjoys less structured events that mix alumni and students.
- Professional events do not allow casual connection.

My interview

Pomona '26 Grad school, New England

- Felt detached from Pomona as soon as he graduated, except for close friends.
- Isolated in his new city; wants informal ways to connect with alumni and students.

What we heard

- **Friends bring people back.** Alumni from Pomona '25 and Scripps '24 said the friendships formed in college keep them connected.
- **Graduation feels like losing a safety net.** Alumni from Pomona '26 and Pomona '24 described going from a high-support campus to feeling alone.
- **Distance changes everything.** Alumni still in Claremont find it much easier to stay connected than alumni in Bali or Berlin.
- **Casual beats formal.** First interactions should feel casual and human, not transactional.
- **Lost traditions matter.** Alumni from Pomona '95 and Pomona '83 both talked about traditions that no longer exist.
- **Alumni worry their advice is outdated.**

> "My perspective may be dated."
>
> Pomona '83

> "I would totally join."
>
> Flyer tester, on the Family Network

> She wants to "pay it forward."
>
> Pomona '24, on her tennis team network

> Fun, informal, and "very college."
>
> Color War participants

Making sense of it

We built an empathy map to separate what interviewees said and did from what they thought and felt. This showed us which parts of our notes were explicit and which were our own interpretation. The transcription below is from the board; sticky colors on the board are interviewees.

Say

Wants to stay connected to PZ

Friendly interactions over pure job talk

Conversations for career stuff feel transactional

"My perspective may be dated"

5C community is important

Lack of traditions going on at 5C

Strong feeling of support

People over the actual campus

Think

Pomona has a strong alumni network

Students would benefit from life lessons, not job talk

Pomona students put too much pressure on themselves

Food = community

Social events bring more real connection than professional ones

Alumni prioritize seeing college friends over current students

Friendships become stronger post grad

Do

Attends alumni weekends

Remains close friends with 5C alumni

Works at the Draper Center

Always interacts with students

Played sports and was involved in clubs

Research technician, located in Claremont

Worked for and with many colleges

Was engaged with Oldenborg and the Smudge Pot

Feel

Misses her college friends

Isolated in life post-campus

Sense of uncertainty, no safety net

Uncertainty after graduation

Self-conscious of age and knowledge

Grateful for support she received from other alumni

Misses her friends most of all

Evidence

7 interviews, classes of '83 to '26, plus 2 background conversations. Empathy map with four quadrants.

Decision

Interview across the whole span of class years and distance, not only recent grads.

My part

2 of the 7 interviews, including Pitzer '25. Shared note-taking on the board.

If shipped

The Feel quadrant is where the needs came from. Any follow-up research should start by checking those feelings with a wider group.

Define

Four personas, written as points of view.

We wrote four points of view from our interviews in the d.school format: a user, what they need, and why. We focused on the first two for ideation.

Recent grad, new in DC Persona 1

needs to feel supported through structured relationships, events, and mentorship

because she did not realize how much support she would need after graduating.

Retired alum who wants to advise Persona 2

needs to feel her advice is useful and wanted by 5C students, and to break generational perceptions of entering the job market today

because she is conscious of her age and feels a lot has changed in career development since she graduated in 1983.

24-year-old Pitzer alum in Claremont Persona 3

needs a space to keep her college relationships over time and give back to Pitzer

because she wants separate spaces for time with old classmates and time as a mentor to current students.

Recent grad in grad school in New England Persona 4

needs to feel included and connected to Claremont through informal, fun relationships

because recent gradhood can be awkward, and alumni decide how much of undergrad to carry with them.

Journey map: persona 1

Built after the class from the interview notes. Not a class deliverable.

Senior year

High-support campus. Friends in the same dorm, professors down the hall, a team or club every week.

Feels: held

Graduation

"Going from a high-support campus to feeling alone." The safety net goes away in a day.

Feels: unprepared

First months away

New city, new job or program. Escapes to see college friends on weekends. Does not know how to reach alumni, or whether she should.

Feels: isolated, uncertain

First reconnection

A teammate's network, or two alumni at an airport. Someone who was once in her position reaches out first.

Feels: grateful, wants to pay it forward

The opportunity is the gap between stages two and four: nothing in the current system makes the first reconnection happen on purpose.

Evidence

Four POVs from seven interviews. Persona 1 draws on Pomona '24, Pomona '26, and Scripps '24.

Decision

Design for personas 1 and 2 (the brief asked for one). The Family Network turned out to serve both at once.

My part

Co-wrote the POVs in class; built the journey map afterward.

If shipped

The first reconnection is the moment to design for. Measure whether it happens, and when.

Ideate

100 ideas, 7 categories, 2 picks.

We started with a "benefit baiting" exercise: list the benefits a product connecting students and alumni could offer, then think of existing products that share those benefits. Connection led us to families, video calls, and shared interests. From there we built a list of 100 ideas and sorted every one into a category. Each category answers one of our seven How Might We questions.

How might we use alumni events to introduce current students to old school traditions?	9 ideas
How might we make alumni feel like their voices are valuable to students?	10 ideas
How might we make the transition between life as a student and life as an alumna easier?	10 ideas
How might we create opportunities for students and alumni to have fun together?	22 ideas
How might we include alumni in more student-led events?	14 ideas
How might we keep students and alumni engaged without transactional relationships?	17 ideas
How might we create alumni events that foster long-term relationships between alumni and current students?	18 ideas

Traditions and eras	9
Alumni voice and advice	10
Transition support and matching	10
Fun together: games, competitions, making	22
Alumni inside student life	14
Shared interests, non-transactional	17
Ongoing exchange, long-term ties	18

How we chose

We did not score the list. We ran mini role-play tests of our strongest ideas with other groups in the class, acting out how each one would work, and picked the two that we liked the most and that our classmates responded to best in that activity. We decided which ideas were the strongest and prototyped those.

What the two picks had in common, looking back: the Family Network (idea 17) served all four personas, especially the first two, so it was the idea with the widest reach. The Color War tournament came from our biggest group of ideas, the fun-together games, so it was the idea that tested our most common instinct. Both could be put in front of real people within a week, one with a flyer and one with a staged event, and neither leads with careers.

Evidence
100 ideas, categorized. 7 HMW questions. The largest category was games and competitions (22).

Decision
Role-play the strongest ideas with classmates, then prototype the two that held up. A program, not an app.

My part
About 30 of the 100 ideas.

If shipped
The other 98 ideas are a backlog. Traditions (9) and alumni voice (10) are untested and cheap to try.

Prototype

Two low-resolution prototypes.

Prototype 1: 5C Alumni Family Network

A program where students and alumni are placed in a "family" of 4 to 6 people and stay in it after graduation. We made a trifold flyer to explain it and used the flyer to collect feedback. It is a prototype for testing, not a final product.

How joining works

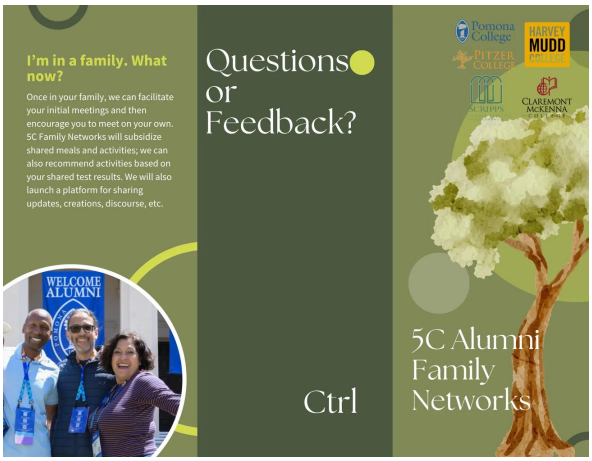

1. **Orientation** Students opt in and take a short matching test.
2. **Matching** Shared non-career interests, hobbies, personality traits, hometown.
3. **Your family** One underclassman, one upperclassman, one recent alum, one older alum.
4. **First meeting** The program sets up the first meeting; families then meet on their own.
5. **Graduation** You stay in your family and move from receiving advice to giving it.
6. **Over time** Subsidized meals and activities; a way to switch families if it is not working.

Program rules

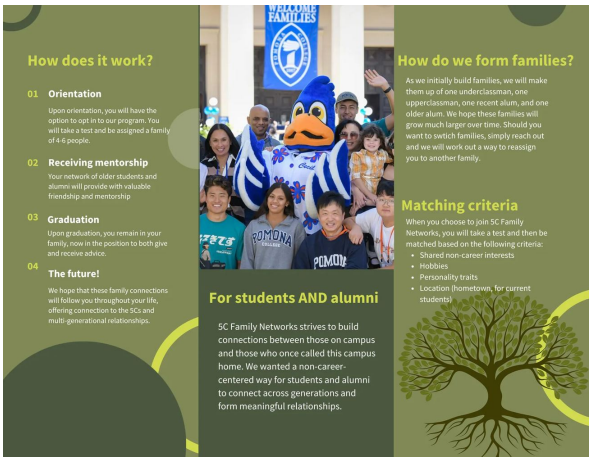

- Opt-in, at orientation.

- Families of 4 to 6, spanning four stages of college life.
- Matched on non-career interests, hobbies, personality, and hometown.
- Careers and colleges are mixed on purpose, to keep it a non-networking space and strengthen ties between the five colleges.
- Subsidized shared meals and activities.
- A platform for sharing updates and creations.

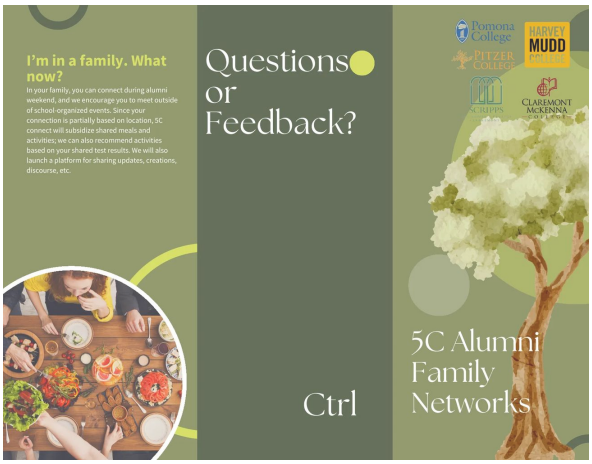

The flyer, revised version

Outside panels, revised.

Inside panels, revised.

First version, outside. Replaced after testing.

First version, inside. Replaced after testing.

Low-resolution prototype for concept testing, built as a trifold in Canva. I helped create the first version and the revised version.

Prototype 2: Color War tournament

An event where seniors, 10-year alumni, and current MBA students play classic college games on mixed teams. We staged it with about 10 participants to see what mixing people in the same space actually does.

What we were testing

Whether shared, informal fun is enough on its own to make students and alumni connect. This was the largest category in our 100 ideas, so it was the hypothesis most worth checking.

Evidence	Decision	My part	If shipped
Two prototypes people could react to: a flyer in hand and a staged event.	Test the join path and the rules, not the visual design. The flyer is deliberately rough.	Helped create both versions of the flyer.	The join path (opt-in, test, match, first meeting) is the part to build first and measure.

Test and iterate

What ten people told us, and what we changed.

Family Network flyer: 10 students and alumni gave feedback

I gathered feedback from 4 of the 10, then used it to help build the revised flyer.

Most people thought joining should be opt-in. We had planned to sign all first-years up automatically, with an option to opt out later.

I collected 4 of the 10

What we changed: the program became opt-in. This was the change that mattered most; see the reflection below.

Some pictures felt impersonal and did not show what the program is.

What we changed: replaced the lawn and food photos with photos of alumni and families at campus events.

The program needed more clarity in places.

What we changed: rewrote the "I'm in a family. What now?" section to explain that the program helps set up first meetings and then encourages families to meet on their own. Added how to switch families.

The flyer needed proofreading.

What we changed: fixed the text in the revised version.

The name can make it sound like something for parents or families of students.

What we decided: kept "5C Alumni Family Networks" for this round, since it is an early concept for testing and not a final product. Renaming is the first thing to do if it goes further.

Positive reactions from both students and alumni, who were interested in joining if it ever launches.

One response: "I would totally join."

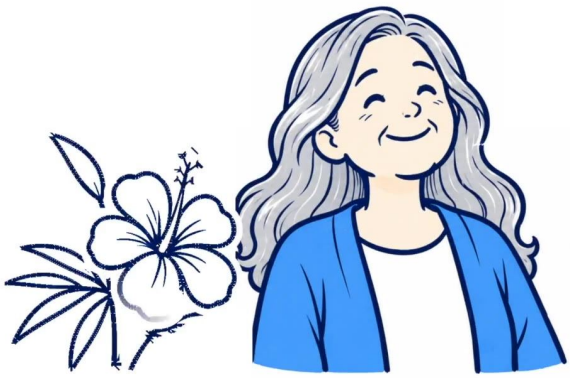

Color War tournament: about 10 people took part

- **What worked.** Participants liked that it felt fun, informal, and "very college." Many liked meeting people from other class years who shared common experiences.
- **What did not.** With little structure, some groups took over the activities while others felt sidelined or unsure how to join. Students and alumni also drifted back to their own groups.
- **What we would change.** More structured teams, rotations, and activities designed to mix people on purpose.

We did not run a survey. With more time, the first thing I would add is a five-question survey to the ten flyer testers to size the opt-in preference rather than infer it from conversations.

The video

We told our user's story in a 2-minute video built from a "storyspine," focusing on the older alum persona with elements of the recent grad persona, to show how the Family Network could connect two people like them. I edited the video. It is drawn, not filmed, so no interviewee appears in it.

A frame from the 2-minute video. The video plays on the web version of this case study.

Evidence	Decision	My part	If shipped
10 flyer testers, 6 recorded themes, 5 changes. About 10 Color War participants, observed.	Reverse the enrollment model. Keep the name for now and flag it. Add structure to the event.	4 of the 10 flyer conversations; helped build v2; edited the video above.	Measure engagement per network, not only networks created, so an opt-in program is judged on quality.

If this launched

How we would know it worked.

A proposal, not a result. Nothing here has been measured.

The system has three kinds of users: the alumni office manager who runs it, alumni, and current students. These are the measures I would set up for the office in the first year.

Family networks created per quarter	Engagement rate per network	Members per network	Who is in the engaged networks
The count the office would report, and the number an opt-everyone policy would inflate. On its own it says nothing about quality.	Interactions per family, quarterly and annually. Starting goal: at least two interactions per family per quarter. This is the measure that catches networks that exist on paper only.	The prototype requires a minimum of 4. The right minimum and maximum for engagement can be A/B tested; too many members may make a family less personal.	Track member attributes the office already holds (gender, age, location, student year, major, job title). Once there is enough data, compare high-engagement and low-engagement networks to see what they have in common.

What I took away

We wanted a big network. We could not force people into it.

A big lesson for me came in the iteration step. When we first designed the 5C Family Network, we planned to sign all first-years up automatically at orientation, and they could opt out later if they did not like it. We thought this would build a strong foundation, since most of each graduating class would already be in the network. When we tested the idea, most people thought it should be opt-in. I realized we had to prioritize the user and not put our goals for the product above them. We want a large network of 5C "families," but we cannot force people to be part of it.

This connects to what we talked about in class: it is hard to keep your own wishes and needs out of the design process, and it was especially hard here because we were designing for ourselves in a way. Finding a balance between what is best for your user and your own idea of what the product should be is important.

The rule I take from it is to balance the needs of the users with those of the alumni office. My hypothesis: opting everyone in would raise the office's count of family networks created, but most of those networks would have low or zero engagement. Alumni and students who are motivated enough to choose to join will form fewer networks, and better ones.

Methods

What each method means.

Empathy interview	A long, open conversation that digs for stories and feelings rather than opinions.
Empathy map	Four quadrants (say, do, think, feel) to separate what we observed from what we inferred.
Point of view	A one-line persona: a user, what they need, and the insight behind it.
How might we	A question that turns an insight into a prompt for ideas.
Benefit baiting	List the benefits a solution should give, name existing things that give them, and borrow from those.
100 ideas	Deliberate over-generation, wild to realistic, before choosing.

Low-resolution prototype	Something cheap and fast (a flyer, a staged event) built to test a concept, not to ship.
Concept test	Asking people whether they would want something, as opposed to whether they can use it.
Storyspine	A story scaffold ("once upon a time, every day, until one day") used to script the video.
Journey map	One persona's experience over time: stages, actions, feelings, and the gap worth designing for.

Sources. Every fact and number on this page traces to the team's interview notes, design write-up, flyer, 100-ideas list, or the class project brief, or is my own account of my part in the work.

Appendix

All 100 ideas, by number.

Category in parentheses. Idea 17 became the Family Network.

1. A pen-pal style "week in the life" exchange where students and alums swap casual video diaries or photo zines (video, prose/writing, slideshow w/images, podcast, etc.) in a creative way they see fit instead of formal job shadowing. (Ongoing exchange, long-term ties)
2. Micro-interest affinity circles for poetry, book discussions, or cooking that pair current seniors with alums to keep creative outlets and campus ties alive. (Shared interests, non-transactional)
3. Reverse-mentorship workshops where students teach alums about Gen Z slang, funny student debates, and current student culture over Zoom. (passionate short slideshow presentations, also practice for public speaking) (Alumni inside student life)
4. An automated hometown/city matching system for alums and students in the same city who share non-career hobbies, backed by stipends and an IG snapshot account. (also for when students/alums travel/move, they can connect with each other more easily) (Transition support and matching)
5. Some sort of app/social media platform that bridges students and alumni more casually and easily (Shared interests, non-transactional)
6. A seasonal shared zine or journal where students & alums drop art, life updates, random thoughts, and answers to nostalgic prompts across time & space. (Ongoing exchange, long-term ties)
7. Partnering alums with students to fund & bring back neglected/forgotten campus traditions/events. (Alumni inside student life)
8. 7C micro-hackathon bringing students and alums from all the colleges together into mixed teams to tackle local civic or climate issues. (Fun together: games, competitions, making)
9. A coffee subsidy program that covers the tab for a first chats between students and alums. (Transition support and matching)
10. Some sort of regional scavenger hunt (for example; sagehen, or campus-representative stuffed animal hidden in every State or each major city) and offering clues, so that students & alumni can collaborate to find them (Ongoing exchange, long-term ties)
11. Open-mic night for students and alums - in Doms Lounge/Smudge Pot (Traditions and eras)
12. Alumni/student creation/art exchange (Fun together: games, competitions, making)
13. Event where students are given information about alums but not their name (graduation year, occupation, interests, fun fact, etc) they have to go around and meet alums to try to find who they've been assigned (Ongoing exchange, long-term ties)
14. Love is Blind style matching show for students and alumni (Alumni inside student life)
15. Amazing race for students to find different alumni around the world (Alumni inside student life)
16. Annual event/festival for students and alumni to compete in loads of different games (Shared interests, non-transactional)
17. Alumni family networks (e.g. before graduation you get an "auntie" who is there for mentorship/advice) (Transition support and matching)
18. Weekly alumni/student video calls (Ongoing exchange, long-term ties)
19. Alumni vs students sports games (Alumni inside student life)
20. Event where students and alumni swap identities and find each other (Alumni inside student life)
21. Student/alum champagne and shackles (Shared interests, non-transactional)
22. Random student-alum bar nights in different cities (Ongoing exchange, long-term ties)
23. Fashion show in which students dress/design for alumni (Alumni inside student life)
24. Matching app where students and alumni take a personality quiz and are matched based on compatibility/similarity (Ongoing exchange, long-term ties)
25. Student and alumni art classes (Fun together: games, competitions, making)
26. Gamify making connections with as many students or alumni as possible with different awards (most connections, longest connection, most active connections) (Ongoing exchange, long-term ties)
27. Match the oldest alum with the youngest student (Fun together: games, competitions, making)
28. "Draw-my-life" presentation for older alums (Alumni voice and advice)
29. Alumni make an "advice tree" where they attach valuable pieces of advice to the branches that students can read (Alumni voice and advice)
30. Alumni-student movie event: groups of students and alumni are given a short script and have a day to make it into a short (5 min) film that is then screened at a mini festival the next day (Fun together: games, competitions, making)
31. Alumni and student speed dating style event - professional or casual/social (Shared interests, non-transactional)
32. Time-travel event: alumni for many generations submit their favorite traditions from their time at the 5Cs and those are recreated by different years (Traditions and eras)
33. Alumni and student day-in-a life video blog website. Students get to see what life can look like after graduation and alumni can see how the college experience has changed or stayed the same. (Transition support and matching)
34. Secret handshake making workshop between students and alumni (Fun together: games, competitions, making)
35. For students with alumni mentors: students present "my alumni taught me..." and share the most valuable advice they've received (Alumni voice and advice)
36. Student and alumni team cook-off or bake-off (smaller event as a part of alumni weekend). (Fun together: games, competitions, making)
37. Student and alumni round table discussion with college leadership about changes they want to see (Shared interests, non-transactional)
38. Student-alumni frat-style wedding party (Fun together: games, competitions, making)
39. Collab with meta glasses that scans faces and identifies alumni out and about (Transition support and matching)
40. Alumni live painting event (painting a student) (Fun together: games, competitions, making)
41. Student and alumni PEC funded trip to space (Fun together: games, competitions, making)
42. Student and alumni skydiving event (builds trust) (Ongoing exchange, long-term ties)
43. Trauma bond students and alumni by putting them in VR headsets which makes them survive dangerous situations together (Ongoing exchange, long-term ties)
44. Alumni shadow the students for a day (role-reversal) (Alumni inside student life)
45. SURP fund for alumni to get student interns (Alumni voice and advice)

46. Students and alumni go to the beach and have to build a boat in teams from basic resources and see whose boat goes the furthest (Fun together: games, competitions, making)
47. Students and alumni put into teams (2 students, 2 alumni) on a deserted island and see who can outlast the rest (Shared interests, non-transactional)
48. Put students and alumni in a shark cage together - see what happens? (Ongoing exchange, long-term ties)
49. Big student-alumni sleepover in the hive - building forts to sleep in, cozy lights, movies, snacks, etc (Fun together: games, competitions, making)
50. Study abroad but you go live with an alumni while at your new institution (Alumni voice and advice)
51. Student alumni hunger games (fight to the death) (Shared interests, non-transactional)
52. Student Alumni Beer league (Alumni inside student life)
53. Virtual Alumni Race (raise money) (Alumni inside student life)
54. Claremont Records (students & alumni compete with each other; who can hold their breath for longest underwater). (Fun together: games, competitions, making)
55. Talent Show (Fun together: games, competitions, making)
56. Great Student-Alumni competition of the 5Cs (students & alumni of each college contribute and collaborate to represent their institution in a competition) (Ongoing exchange, long-term ties)
57. Crafting classes with Alumni (Shared interests, non-transactional)
58. Alumni student initiative to craft an alma mater college song (Shared interests, non-transactional)
59. Alumni/Student family simulations (every 4 years you are matched to a "family" cohort, where you play a simulation game like Bit Life) (Ongoing exchange, long-term ties)
60. Capture the Alumni (capture the flag) (Fun together: games, competitions, making)
61. Student Alumni Game Hub (Clash of Clans, Hay Day) (Fun together: games, competitions, making)
62. Remote Farm where Claremont Alumni & Student collaborate and care for the land (without technology) (Fun together: games, competitions, making)
63. Alumni Hotline (number connects to random alumni) (Transition support and matching)
64. Tradition Weekend; Alumni planned events/traditions for students (simulate going back in time) (Themed parties based on grad year; e.x. 80s themed) (Traditions and eras)
65. Story sharing circles with alumni (Alumni voice and advice)
66. Camping trips student/alumni (Fun together: games, competitions, making)
67. Alumni ski-beach day (roping them in) (Alumni inside student life)
68. 47 things to do as a young grad (incorporating meaningful bucket list ideas for them too) (Transition support and matching)
69. Student-Alumni Bake Off (inspired by San Francisco Cake Party) (Shared interests, non-transactional)
70. Website/Account for Alumni of The Day (alumni across space and time highlighted; how they're doing, sharing whatever they want about themselves) (Shared interests, non-transactional)
71. Student Alumni Psychedelics Retreat (Fun together: games, competitions, making)
72. Annual StudentxAlumni movie/documentary production (people can sign up to contribute whatever way they please; rotate out so not same people each year) (Ongoing exchange, long-term ties)
73. Student Alumni Reddit-Equivalent (ask questions, share, upvote/downvote messages) (Shared interests, non-transactional)
74. Alumni "First Year Again" Day: alumni return to campus and get treated like first-years for a day: dining hall meal, campus tour, dorm games, club fair, etc. (Traditions and eras)
75. Then vs. Now Dinner Tables: mixed generations get prompt cards comparing dating, classes, traditions, slang, nightlife, protests, fashion, and campus culture across decades. (Shared interests, non-transactional)
76. Tradition Adoption Program: student clubs "adopt" a discontinued alumni tradition and reinterpret it for the present day. (Traditions and eras)
77. Alumni Mystery Box Night: alumni send objects, photos, songs, or memorabilia from their college years, and students guess the story behind each item before hearing the real version. (Ongoing exchange, long-term ties)
78. Senior-to-Alum Transition Buddy : every graduating senior gets paired with an alum who graduated 1–3 years earlier specifically to help with the emotional/social transition after college. (Transition support and matching)
79. The First 100 Days After Graduation Club (Transition support and matching)
80. Alumni Dorm Dinner (Alumni inside student life)
81. Teach Me Your Era Night: students and alumni teach each other dances, games, slang, fashion trends, or traditions from their generation. (Traditions and eras)
82. Alumni Club Guest Week: student organizations invite alumni members back to participate casually in a regular club meeting, rehearsal, practice, or event. (Alumni voice and advice)
83. Postcard From Your Future: alumni write anonymous postcards about what surprised them after graduation and students write responses about what they imagine their future will be like. (Transition support and matching)
84. Campus Legends Live: alumni share funny, strange, or memorable stories from their college years in a live storytelling event. (Shared interests, non-transactional)
85. Recreate the Photo: students recreate old alumni campus photos in the same locations, poses, and outfits. (Traditions and eras)
86. Alumni Student Trivia Night (Fun together: games, competitions, making)
